

Steps to create a Kubernetes Engine cluster in GCP (Google Cloud Platform):

1. Log in to the google cloud console(console.cloud.google.com) with your google account.
2. Go to the Kubernetes Engine dashboard by clicking on the hamburger menu in the top left corner and selecting **“Kubernetes Engine”** under **“kubernetes”** and go to **Clusters**.

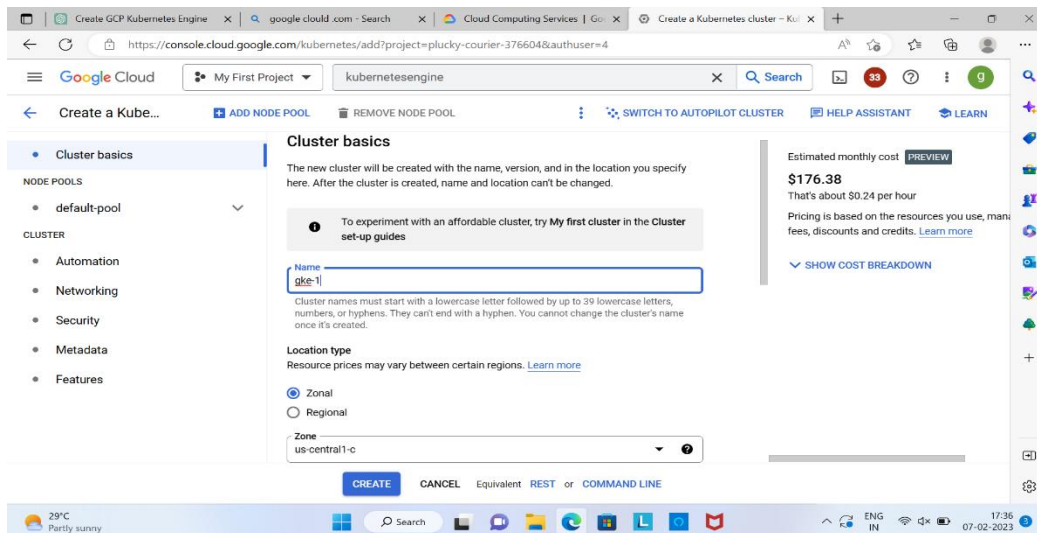

3. Click on **create Cluster**.

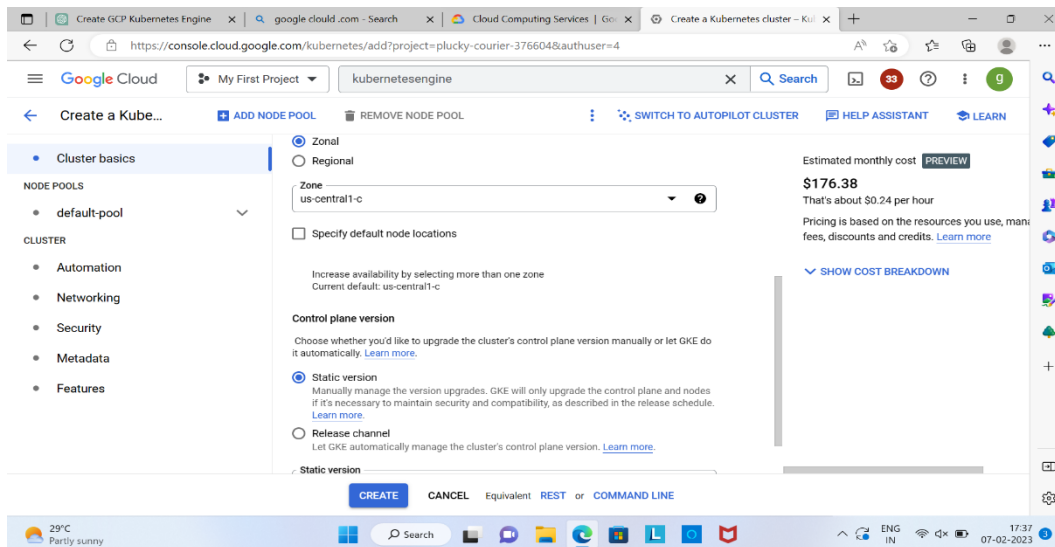

4. Fill in the following information:

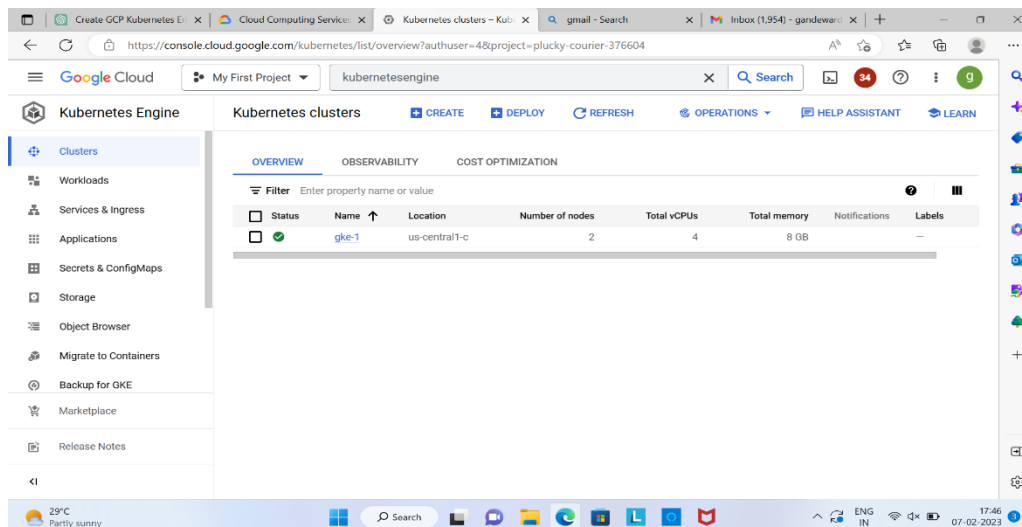

- Cluster name: choose a unique name for your cluster.
- Zone: select the geographic region where you want your cluster to run.

- Select the Control panel version as **Static version**.

5. Click on **Create button**. Wait for your cluster to be created, which may take several minutes.

6. When the cluster is created, click on the connect button and then on “**Run in cloud shell**” to open a terminal window in the google cloud console.
